SAMARTH BHOGTE

samarthbhogte0@gmail.com | (857) 421-9086 | Boston, MA

SUMMARY

Software Development Engineer with an M.S. in Information Systems and experience building full-stack and mobile applications using JavaScript/TypeScript, React, React Native, Node.js, Python, and REST APIs. Experienced in production features spanning social platforms, authentication, payments, databases, and AI-powered applications.

EDUCATION

Northeastern University | *M.S. Information Systems* Sep 24 - Dec 26
Mumbai University | *B.Tech. Electronics Engineering* Jun 18 - May 22

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python
Frontend: React.js, React Native, Expo, Redux, Next.js, Material-UI, Tailwind CSS, HTML, CSS/SCSS
Backend & APIs: Node.js, Express.js, NestJS, FastAPI, REST APIs
Databases: MySQL, Oracle DB, MongoDB, SQLite
Cloud & Tools: AWS S3, Git, GitHub, Postman, VS Code, Xcode, Apache NetBeans, Eclipse
AI & GenAI: Prompt Engineering, LLMs, LangChain, RAG, FAISS, NLP, Hallucination Reduction

EXPERIENCE

OurFreedom.ai | *Software Development Engineer* | New York, NY Jan 26 - Jun 26
- Developed and shipped production features across a React Native/Expo mobile application and backend services, contributing to social feeds, user profiles, authentication, notifications, content moderation, email functionality, and mobile releases.
- Engineered end-to-end social features including post creation and sharing workflows, profile management, reporting/moderation tools, and user-experience enhancements across frontend and backend systems.
- Contributed to payment functionality including Apple Pay and Stripe integrations while solving complex technical issues and delivering production-ready features in a fast-paced startup environment.

WHP Jewelers' India | *Web Developer* May 23 - May 24
- Improved website performance and user experience by building responsive UI components with HTML, CSS, JavaScript, and React, reducing load times by 18% and increasing mobile engagement by 16%.
- Optimized application performance through lazy loading, caching, and code improvements, reducing page load time by 12% and improving server response time by 23%.

KPMG India | *Data Analyst Intern* Aug 22 - Feb 23
- Optimized SQL and Python data pipelines by designing efficient ETL workflows, reducing processing time by 12% while improving data accuracy through validation, cleansing, and query optimization.
- Automated reporting and analysis to reduce manual effort by 18% and identify workflow inefficiencies, enabling faster and more reliable data-driven decisions.

PROJECTS

Lumina | *AI Compliance Assistant* Sep 25 - Dec 25
- Developed an AI compliance chatbot using GPT-4, LangChain, FastAPI, and FAISS with a RAG pipeline to query GDPR and HIPAA documents using semantic, cosine, and fuzzy matching for accurate, cited responses.
- Built a Next.js + Tailwind CSS frontend and FastAPI backend with validation and error handling, delivering an end-to-end scalable prototype.

Care-Link Connect | *Full-Stack Volunteer Management Platform* Sep 24 - Dec 24
- Engineered a full-stack application using React.js, Node.js, Express.js, and MongoDB with JWT authentication, Stripe integration, real-time task scheduling, and role-based access control.

TaskTrek | *Java Desktop Application* Jan 25 - May 25
- Built a Java Swing and SQLite task management application with secure authentication, task scheduling, JDBC persistence, custom data structures, and a modular DAO/model/UI architecture.
